

Shading & AV Solutions for Home

Transform your home into a uniquely beautiful retreat – indoors or out – with the simple elegance of Draper At Home custom shades.

INDOOR SHADES

FlexStyle®

Sleek. Simple. Stylish. And smart! FlexStyle open-roll motorized roller shades are designed especially for residential use. Curved brackets install easily and hide wiring. 9 designer colors and plated finishes make FlexStyle perfect for the most exacting homeowner!

FlexShade®

These UL listed motorized shades bring flexibility and versatility to your project. FlexShade models are available with open-roll brackets, endcaps with fascia, or surface or pocket headboxes in Clear Anodized or 4 stylish and durable powder coated finishes.

CHOOSE MOTORIZATION THAT BEST FITS YOUR PROJECT:

Line Voltage Shades Multiple wired and wireless control and automation options are available for any scale project.

Low Voltage Shades Quiet, consume less power, and require less wiring by an electrician. They are easy to integrate for convenient automation and long-term, worry-free performance.

Battery Shades Battery-powered window shades offer the convenience of motorization without hardwiring and electricians. Wireless controls make these shades simple to program and easy to use.

OUTDOOR SHADES

Draper At Home shades expand homes' usable square footage without costly additions, creating comfortable outdoor living spaces.

FlexShade ZIP uses a unique "zipper" detail on both vertical fabric edges to retain the shade in the side channels. Wind tunnel-tested to keep out glare, weather, and insects.

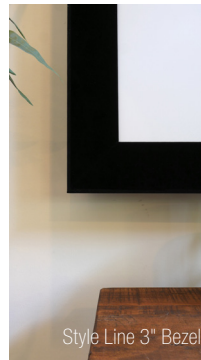

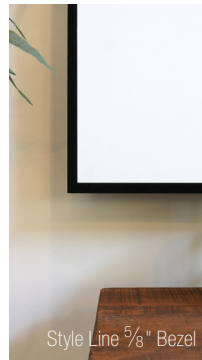

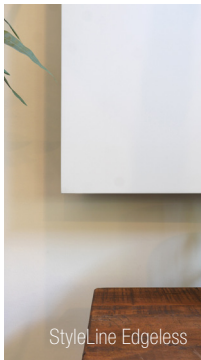

Exterior FlexShade features cable guides or side channels to keep the shade fabric in place. This shade does not offer the same tight closure as ZIP shades.

Custom Not every challenge has a standard solution. Draper At Home can design and manufacture a unique system tailored to your project.

Create entertaining spaces at home with Draper At Home AV solutions for home theaters, rec rooms, or outdoors.

PROJECTION SCREENS

StyleLine: The performance of multiple screen types in a single fixed screen model.

LIFTS & MOUNTS

Video Wall Mounts & Structures

Are you looking for a truly huge flat panel TV experience at home? Our range of audiovisual mounts & structures offers solutions for virtually any LED manufacturer to create a big, breathtaking display. The **Foundation® Mount System** offers the keys to dvLED video wall installation success and homeowner satisfaction: durable mounting hardware with extreme alignment precision and design simplicity.

Projector Lifts

Conceal and protect your projector above the ceiling until showtime with an AeroLift projector lift. When it's time for the show, lower your projector into the perfect position at the touch of a button. These small lifts are perfect for home theater applications. Each AeroLift model varies in vertical extension length and maximum lifting capacity and features a stabilizing arm for cable management.
