

Kedry Skylife

KE

Gennius Pergolas

Skylife provides the best combination of louvers and a fully retractable roof. This allows for unrestricted view of open sky when retracted, and a watertight seal when closed.

Skylife can be installed side-by-side to create an unlimited amount of covered space and is perfect for commercial or hospitality venues of all sizes.

Integrated, dimmable LED lighting allows you to determine the light level you want so you can get the most from your outdoor space, day or night.

There is no limit to what you can achieve with Skylife. Create an outdoor space to be used any time all year long for entertainment, relaxation and dining with family, friends, customers or just for you.

Sliding glass doors are available to create an enclosed space that blocks wind and cold, creating a year-round outdoor room. Motorized screens can be integrated into the structure and hidden from view. Screen fabrics are available with a wide variety of colors and openness to create the exact kind of space you want.

Wind, rain and temperature sensors are available to create a system that is easily controlled remotely or automatically as desired. Fully compatible with home automation systems.

KEDRY SKYLIFE

Skylife is available as a free-standing structure or can be mounted to a fixed wall.

				
Shade on demand when desired and waterproof as needed.	Kedry Skylife is designed to withstand strong wind (up to 9 on the Beaufort Scale).	Maximum width of a single unit: 14' 9"	Maximum projection of a single unit: 20' 1"	EN 1090:2014 EN 13561:2015
